
Nec Pc 6001 Roms 61

Download

This is an NEC PC-6001 series emulator. PC6001VX includes compatible ROM files so you can download the emulator without genuine ROMs. For the best emulation, you will need an emulator. This emulator runs on an IBM PC with a 386SX compatible processor and a clock speed of 33 MHz or less. On an IBM PC with a 386DX processor, the emulator starts when using 32 MHz mode, and it is a Pentium processor emulator. When the emulator starts, a screen is displayed with information about the status of the emulation. The screen is displayed as a sequence of characters: 'HELLO...' on a black background and 'DELETE...' on a white background.
